

## CASE STUDY: *Education*

**End User:**

Kontawig Vocational School of Technology and Business Studies

**Line of Business:**

Vocational School

**Location:**

Eger, Hungary

**Number:**

60 SUNDE Diana Zero Clients

**User:**

Vocational School Students

**Goal:**

A low-cost computing solution that could replace the school's PCs and shrink the cost of the five-year rotation cycle of PCs.

**Solution:**

60 pcs of SUNDE Diana Zero Clients are deployed in the classroom and connected to 4 pcs of DELL PE T110-II.

**Achievements:**

1. Lower IT purchase cost.
2. Shrink the cost of the five-year rotation cycle of PCs.
3. Cut energy costs.
4. Minimize computing support and maintenance time and expense.

**Solution Provider**

---SUNDE partner in Hungary

During a routine PC refresh cycle in 2012, the IT director of Kontawig Vocational School of Technology and Business Studies set out to plan a new

infrastructure that would satisfy two criteria: It had to be cost-effective; it needed to satisfy short-term needs but be flexible enough to expand in the future. He started researching centralized computing and reached out to

SUNDE to learn more about zero client computing. SUNDE, he said, was the most responsive in addition to having the best solution. SUNDE Diana Zero Client moves 100 percent of the computing to the server and connects users to the computing resources with a zero client, included in the solution, which contains no software, no processor, no storage nor any moving parts. Since deploying 60 SUNDE Diana Zero Clients, the school has experienced a number of benefits, including cost savings on the initial purchase and energy savings. In addition, SUNDE Diana completely eliminates endpoint management and replacement cycles. SUNDE Zero Client can last as long as 10 years.

*“The benefits we receive with SUNDE are ideal and exactly what we’ve been striving for.”*--- The school IT director.
